Small company takes part in Texas clean energy program

I have a unique appreciation for the innovative edge that investment in clean energy offers.

As a Texas rancher with a keen eye for new efficiencies and cost-saving technologies, I've witnessed the impact that reducing emissions sequestering carbon and creating efficient energy sources

can have on our state's economic growth.

Texas is no stranger to new frontiers and continues to lead the South in clean energy development.

Our small company, Gulf Coast Green Energy, is one of those companies.

See **SNEARY** Page 8A.

SNEARY

From Page 4A

We're proud to be a part of the new and growing Texas clean energy industry by adding efficiency and reducing emissions in the oil and gas industry with the ElectroTherm Power+ waste heat-to-power generators that make pow-

er from heat that would otherwise be vented to the atmosphere.

So, I am proud to learn that the Lone Star state is officially celebrating National Clean Energy Week. I encourage everyone to use the occasion to reflect on our successes and renew our commitment to a clean energy future. I applaud Texas Governor Greg Abbott for continuing to demon-

strate strong leadership, most recently by recognizing September 21-25, 2020 as Clean Energy Week throughout the state of Texas. This year, Clean Energy Week is a celebration of Texas's future, where economic prosperity and environmental stewardship go hand in hand for the benefit of all Texans.
